

23 January started the school project – activities organized in the Primary School in Skulach in cooperation with the Foundation Friends of the School in Książenicach, financed by the funds of the PZU Foundation.

At the first meeting, on the basis of the film by Witold Czuksanow „Z wizytą w rezerwacie Skulskie Dęby” and other information posted on the Internet about the second reserve of nature Skulski Las, participants got acquainted with the biodiversity occurring in the objects. The students prepared materials for a multimedia presentation. Together with the teacher they discussed the planned tasks and ways of their implementation.
